Ideal for both neurosurgical residents and recertifying neurosurgeons, *Neurosurgery Self-Assessment: Questions and Answers* offers the most comprehensive, up to date coverage available. Over 1,000 clinically relevant multiple-choice questions across 46 topic areas test the candidate's knowledge of basic neuroscience and neurosurgical subspecialties to an unparalleled degree and provide detailed answer explanations to facilitate learning and assessment. Over 700 histology, pathology, radiology, clinical and anatomical images serve as an index of routinely tested-on images in neurosurgical examinations with high-yield summaries of each pathology to reinforce and simplify key concepts. Includes only multiple choice questions in both single-best-answer and extended matching item (10-20 options) format increasingly adopted by neurosurgery certification boards worldwide. Questions are organized by topic and classified by degree of difficulty through a highly visual "traffic light system" which codes each question in green, amber, or red. Includes coverage of the landmark studies in areas such as vascular, stroke, spine and neurooncology. Practical tips facilitate study with test-taking strategies and things to consider before sitting for an exam. Utilizes Imperial and SI units throughout. User-friendly yet sophisticated, *Psychological Assessment With the MMPI-2* will be welcomed by practicing psychologists, researchers, and students alike. This long-awaited second edition constitutes the single most comprehensive and up-to-date textbook of MMPI-2 interpretation. Completely rewritten to address the changes to the original instrument

that resulted in the MMPI-2 in 1989, it describes in detail all the MMPI-2 scales--clinical, supplementary, and content--and offers empirically-grounded and clinically-tested recommendations for their use. The last decade has seen an explosion of research, as well as a steady accumulation of experiential wisdom; bridging the gap between behavioral science and practice, the authors review all the major findings and their implications and draw on rich clinical material to illuminate the issues. This second edition: * helps users with forensic interests including attorneys needing a reference for expert review; * gives step-by-step advice on interpreting profiles; * includes treatment recommendations in the explanation of every code pattern; * provides extensive guidance on report-writing for new users; * compares the most current MMPI-2 computer reports; * features numerous tables, figures, and appendices for all the MMPI-2 scales including the newer validity measures; and * incorporates 570 references (235 completely new). Real-world questions with clear answers regarding educational topics such as grading, instruction, and best practices to ensure success for all students. Ideal for both neurosurgical residents and recertifying neurosurgeons, *Neurosurgery Self-Assessment: Questions and Answers* offers the most comprehensive, up to date coverage available. Over 1,000 clinically relevant multiple-choice questions across 46 topic areas test the candidate's knowledge of basic neuroscience and neurosurgical subspecialties to an unparalleled degree and provide detailed answer explanations to facilitate learning and
