Print+CourseSmart This book pieces together the jigsaw puzzle of Einstein's journey to discovering the special theory of relativity. Between 1902 and 1905, Einstein sat in the Patent Office and may have made calculations on old pieces of paper that were once patent drafts. One can imagine Einstein trying to hide from his boss, writing notes on small sheets of paper, and, according to reports, seeing to it that the small sheets of paper on which he was writing would vanish into his desk-drawer as soon as he heard footsteps approaching his door. He probably discarded many pieces of papers and calculations and flung them in the waste paper basket in the

Patent Office. The end result was that Einstein published nothing regarding the special theory of relativity prior to 1905. For many years before 1905, he had been intensely concerned with the topic; in fact, he was busily working on the problem for seven or eight years prior to 1905. Unfortunately, there are no surviving notebooks and manuscripts, no notes and papers or other primary sources from this critical period to provide any information about the crucial steps that led Einstein to his great discovery. In May 1905, Henri Poincaré sent three letters to Hendrik Lorentz at the same time that Einstein wrote his famous May 1905 letter to Conrad Habicht, promising him four works, of which the fourth one, *Relativity*, was a rough draft at that point. In the May 1905 letters to Lorentz, Poincaré presented the basic equations of his 1905 "Dynamics of the Electron", meaning that, at this point, Poincaré and Einstein both had drafts of papers relating to the principle of relativity. The book discusses Einstein's and Poincaré's creativity and the process by which their ideas developed. The book also explores the misunderstandings and paradoxes apparent in the theory of relativity, and unravels the subtleties and creativity of Einstein. This book is designed to help prepare students to

plan, organise, and direct special events and festivals. This book includes a look at the evolution and history of special events and explains the skills and processes needed to implement them. This nuts-and-bolts approach details the methods to achieve specific goals and objectives in event planning from concept to completion. The second edition includes updates on technology and new case studies, addresses major issues such as terrorism, and provides a new chapter on professional opportunities in event management. The Let's Talk About It (LTAI) books series address important but challenging topics for children and adults in an effort to end child abuse. These books will equip children with tools necessary to protect themselves from physical, mental, psychological and sexual abuse. Intended to open the lines of communication between adults and children; LTAI books will lead to empowering conversations on 'taboo' topics that will decrease abuse against children. The initial six part series; which will include three books about girls and three books about boys, focuses on the prevention of sexual violence against children. In the first book, "My Body is Special," Eva empowers other children to take ownership of their bodies and provides them with problem solving tools to help prevent an unhealthy touch. Eva teaches

children what to say, what to do, where to go and who to tell if they ever feel unsafe around another person. The goal of the book is for each child who encounters this book to develop their own individual personal plan of action to prevent this type of abuse. This bestselling all-in-one guide to the event planning business is back and better than ever, fully updated and revised to reflect the very latest trends and best practices in the industry.
