Se sarà fortunata riuscirà a uscirne viva, ma se la sua fortuna fosse esaurita? Un legal thriller psicologico affascinante che vorrete leggere con le luci accese! This book examines the popular bases of Communist influence in Italy, focusing on the struggle between the Catholic Church and the Communist Party for the allegiance of the Italian people. The author details the ways in which the citizens resolve the central paradox of Italy, which lies in its beings the home both of

the Vatican and of the largest Communist party of any non-Communist nation. He discusses the local structure of the Party, including its many allied organisations and the nature of participation in Party affairs, and stresses its role in local social life. In this study, Professor Kertzer draws upon the experiences and observations of a year spent in a working-class quarter of Bologna, the capital of Italian Communism. While the national Communist Party calls for conciliation with the Church, there is an ancient tradition of anti-clericalism in this area. Moreover, the official Church position excludes the possibility of people being both Catholic and Communist. The implications of this situation for local-level tactics of Church and Party, and how people divide their allegiances between the competing claims, form the primary theme of the book. This volume presents a wide range of contributions that analyse the cultural, sociological and communicative significance of tears and crying in Graeco-Roman antiquity. The papers cover the time from the eighth century BCE until late antiquity and take into account a broad variety of literary genres such as epic, tragedy, historiography, elegy, philosophical texts, epigram and the novel. The collection also contains two papers from modern socio-psychology. The Holy Father's teaching seeks to make clear that, without a fundamental mutual respect and devotion, any sexual act between a husband and wife is a counterfeit of the real thing. Such an evil act is not what the Lord of Life wants human beings to contribute to the creation of a new life. A woman who has no way to escape such abuse is morally justified in resorting to effective, non-abortifacient but medically effective means to avoid being impregnated. Since the adoption of the UN Charter in 1945, the use of cross-border force has been frequent. This volume invites a range of experts to examine over sixty conflicts, from military interventions to targeted killings and hostage rescue operations, and to ask how powerful precedent can be in determining hostile encounters in international law.-- A new history explores how one of Renaissance Italy's leading cities maintained its influence in an era of global exploration, trade, and empire. The Grand Duchy of Tuscany was not an imperial power, but it did harbor global ambitions. After

abortive attempts at overseas colonization and direct commercial expansion, as Brian Brege shows, Tuscany followed a different path, one that allowed it to participate in Europe's new age of empire without establishing an empire of its own. The first history of its kind, Tuscany in the Age of Empire offers a fresh appraisal of one of the foremost cities of the Italian Renaissance, as it sought knowledge, fortune, and power throughout Asia, the Americas, and beyond. How did Tuscany, which could not compete directly with the growing empires of other European states, establish a global presence? First, Brege shows, Tuscany partnered with larger European powers. The duchy sought to obtain trade rights within their empires and even manage portions of other states' overseas territories. Second, Tuscans invested in cultural, intellectual, and commercial institutions at home, which attracted the knowledge and wealth generated by Europe's imperial expansions. Finally, Tuscans built effective coalitions with other regional powers in the Mediterranean and the Islamic world, which secured the duchy's access to global products and empowered the Tuscan monarchy in foreign affairs. These strategies allowed Tuscany to punch well above its weight in a world where power was equated with the sort of imperial possessions it lacked. By finding areas of common interest with stronger neighbors and forming alliances with other marginal polities, a small state was able to protect its own security while carving out a space as a diplomatic and intellectual hub in a globalizing Europe. 1792.214 First multi-year cumulation covers six years: 1965-70.
